

Don't just take our word for it

"With Gigaclear we can use the Internet as it was intended, not staring at a frozen screen for hours on end"

Gigaclear customer, Oxfordshire

"We like the fact that we can download unlimited amounts of data too. Previously we had a 10GB limit. We seldom went over it but if we did, we felt we were being ripped off"

Gigaclear customer, Oxfordshire

"We watch TV shows using BBC iPlayer without interruption, access our daily newspapers online and most importantly have regular and reliable Skype conversations with our grandchildren"

Gigaclear customer, Oxfordshire

"We had a potential house buyer pull out when they heard how slow the broadband speed was at the time - that wouldn't happen now!"

Gigaclear customer, Oxfordshire

"I think if we lost our broadband service now, it would be an absolute shock to the system!"

Gigaclear customer, Oxfordshire

"I am now able to work just as efficiently at home as in the office. This means that I can miss the rush hour completely and have a better work/life balance"

communities to achieve
their online needs today
and in the future.

Order today! Pure fibre broadband and telephone for just £46.80 per month

Fibre or Pure fibre broadband?

Simply put, the key to enjoying your time on the Internet is usually influenced by the speed and reliability of your connection. The only way to get ultrafast and consistent speed is with pure fibre to your home, not fibre to the cabinet and then the same old copper to your home as others have to put up with.

Your broadband speed impacts your ability to access your online world, whatever and whenever you want.

Gigaclear provides the UK's fastest* broadband. Ultrafast broadband that runs at the speed of light directly to your home using pure fibre optic cables, no copper, no wires, no compromise. Our service offers reliable speeds from 50Mbps up to 1000Mbps, both up and down, with Internet access up to 40x faster for downloads, and up to 320x faster uploads than the UK average*.

It is no surprise then, that our broadband speed is classed as ultrafast.

Activity

	ADSL Broadband @4Mbps/0.4Mbps	Home 50 Pure Fibre Broadband @50Mbps down/up	Home 1000 Pure Fibre Broadband @940Mbps down/up
Approx. File Size: 92MB Music Download (23 Songs) 	TAKES 3.21 MINUTES	TAKES 13.3 SECONDS	TAKES 1.6 SECONDS
Approx. File Size: 3GB 3 Hour HD Film Download 	TAKES 107 MINUTES	TAKES 7.4 MINUTES	TAKES 53 SECONDS
Approx. File Size: 500MB Upload 200 Photos 	TAKES 3 HOURS 54 MINUTES	TAKES 72 SECONDS	TAKES 8.7 SECONDS

(All tests carried out on the same PC, using the same files across 3 different network connections between 4pm-6pm Weekday)

What could ultrafast broadband mean for you?

A happy online family

Ultrafast broadband is fast enough to cater for multiple Internet users at home. Whether your family be on smart phones, computers, tablets or games consoles, now you won't be fighting over Internet usage like you would the bathroom in the mornings!

Working smarter

Send and receive emails instantly, upload and download large volumes of data within seconds, and hold video conferencing and online meetings in real time. Everything happens in an instant. Working smarter means less commuting and more time at home.

Being social

Post on Facebook in real time, pin that Pinterest image and share it with friends instantly, or quickly connect with a work colleague on LinkedIn – create, share or exchange information in the world of social media, without having to go to town for faster WiFi.

Staying in touch

You can video chat to family and friends around the world. From wishing your grandchildren goodnight on Skype to catching up with friends on Facetime, slow broadband speed will never again get in the way of staying in touch.

Being entertained

Ultrafast broadband opens up a whole new world of online entertainment, from streaming or downloading music and videos, playing online interactive games to catching up on TV programmes - all available immediately at the click of a button. The days of buffering and delays are gone.

Being inspired

The online world is moving at an incredibly exciting pace, offering lots for you and your family to enjoy. Ultrafast broadband enables you to be part of the online revolution, from distance learning, entertainment, gaming and staying in touch, to home working, video monitoring and remote medical care.

The benefits are endless

What does ultrafast broadband mean for my community?

According to property experts Rightmove[†], fast and reliable broadband can increase the value of your property. Broadband speeds were ranked as more important than transport links or even nearby schools when searching for a new home. This has led Rightmove to add a broadband speed checker to every one of its online listings.

Ultrafast broadband also aims to help generate community spirit. By enabling people to work smarter means less time on the road and more time enjoying the community they live in.

[†]March 2014, survey of 3000 people.

Is it expensive? In one word – No!

Gigaclear delivers the fastest broadband in the UK at prices that will impress you when you compare our performance to other 'fibre' broadband packages that may be available to you. Our pricing and offerings are clear and simple – what you see is what you get, there are no hidden charges or extras.

More speed, same cost

Gigaclear broadband delivers not only the fastest speeds available in the UK, but with much better value compared to what you could get from other fibre broadband providers. Delivered to your home using pure fibre with no copper wires slowing you down, our service is already up to 40x faster* than the UK average speeds.

Typical monthly cost comparison

Enjoy a better telephone service

Customers can have as many telephone lines as they need, all without the need to pay line rental. We have partnered with Vonage, one of the world's leading broadband telephony providers who deliver a feature rich phone service, combining exceptional call quality with more free useful calling features. Plus if you wish to keep your existing number and handsets, Vonage can simply arrange the transfer of the majority of existing UK landline phone numbers**.

It is simple - all you need is to connect your Gigaclear broadband connection, your regular home phone and your Vonage Box™, when all three are connected you are all set to make phone calls in exactly the same way as you always did, just lift your handset and dial. Call Plans start from just £8 per month including all the popular call features at no extra cost.

Simple set up

Step 1:

Connect your Vonage Box to your existing broadband

Step 2:

Plug your phone into your Vonage Box

Step 3:

Pick up your phone and ring somebody

For more information visit www.vonage.co.uk/gigaclear

**Currently Sky and some Talk Talk numbers cannot be ported

Why wait...

The faster you sign up, the faster you and your community can enjoy the benefits of Gigaclear ultrafast fibre broadband.
